OCTOBER (NO SEMINAR)

NOVEMBER 5 & 6, 2016

Dialectical Behavior Therapy Integrating with Motivational Interviewing

Dialectical Behavior Therapy (DBT) is a comprehensive cognitive-behavioral treatment originally described for Borderline Personality Disorder (BPD). DBT is especially effective for those with dysregulated behaviors. Research has shown DBT to be effective in reducing suicidal behavior, psychiatric hospitalization, dropout from treatment, substance abuse, anger and interpersonal difficulties. A collaborative person centered form of guiding to elicit and strengthen motivation for change. An evidence-based practice in the treatment of individuals with substance use disorders.

Instructor: Ali Hall, J.D., MINT
